IGNACIO DEVITA

Software Developer

About Me

Passionate about continuous learning in the tech world, I strive to improve every day and expand my knowledge across different areas. I'm eager to get involved in both artistic and challenging projects, always bringing a creative and unique perspective. I also take pride in paying close attention to detail, ensuring quality and originality in everything I do.

Projects

Charlotteo - Final Project Holberton

Frontend - React, JSX, HTML, CSS

A chatbot-powered tool using OpenAI to analyze VMware metrics, generate technical reports, and provide contextual recommendations in natural language improving troubleshooting and decision-making in Cloud operations. I was responsible for the frontend development, UI/UX design, and chatbot testing.

This project was developed for a real client: Willin, a technology company seeking to optimize their Cloud infrastructure operations.

[May 2025 - Jul 2025](#)

AirBnB Clone API

BackEnd & FrontEnd - Python, HTML, CSS

Built a RESTful API using Flask for an AirBnB clone, featuring full CRUD operations, JWT authentication, and role-based access control. Refactored the codebase with Python.

[Feb 2025 - Apr 2025](#)
